

GAC Cartridge Filter

IMPORTANT:

Not to be used where water is micro biologically unsafe or with water of unknown quality without adequate disinfecting before and/or after the filter.

This cartridge should be installed with the gasket end against the screw cap. Be sure to check your flow direction.

Remove outside wrapper before installation. After installation filter should be flushed with sufficient water until water runs clear.

The cartridge contains GAC (Granular, activated carbon) to improve taste and odor while reducing organic contaminants.
