

Deluxe Countertop with top mount Swivel Spout

H2O-CT4

Overview

The legacy **H2O-CT4** is a high-capacity countertop filtration system that uses **KDF® 55** and premium **coconut-shell granular activated carbon (GAC)**. It effectively reduces **chlorine**, volatile organic compounds (**VOCs**), trihalomethanes (**THMs**), and most EPA-listed contaminants, improving water color, taste, and odor. The system installs easily on most standard kitchen faucets and is ideal for homes, apartments, offices, and RVs.

Features and Benefits

- 10,000 gallon capacity
- KDF®/GAC Filter Media
- Removes Chlorine
- 5-stage filtration and purification system
- Kitchen faucet diverter and adapters fit most standard faucets
- Quick connect fittings for simple installation/replacement
- Bacteriostatic media prevents bacteria growth (algae, fungi)
- Improves taste and color, eliminates odors
- Reduces most EPA listed contaminants
- Includes prorated warranty
