

Deluxe Undersink System with Stainless Steel Faucet

H2O-US4-F

Overview

Our legacy deluxe **H2O-US4-F** under-sink system is designed for enhanced performance and extended service life. Built with **KDF® 55** and premium **coconut-shell granular activated carbon (GAC)**, it effectively reduces **chlorine**, volatile organic compounds (**VOCs**), trihalomethanes (**THMs**), and most EPA-listed contaminants. Discreetly installed under the sink, it connects to a dedicated stainless-steel faucet, delivering improved water quality at the point of use.

Features and Benefits

- 25,000 gallon capacity
- KDF®/GAC Filter Media
- Removes Chlorine
- 5-stage filtration and purification system
- Includes easy-installation kit
- Connects to separate stainless steel long-reach faucet
- Bacteriostatic media prevents bacteria growth (algae, fungi)
- Improves taste and color, eliminates odors
- Reduces most EPA listed contaminants
- Includes prorated warranty
