

Chromed Deluxe Filter System w/ Replaceable Cartridge

H2O-RCT-CP

Overview

The legacy **H2O-RCT-CP** is a chrome countertop filtration system with a proprietary replaceable cartridge—distinct from standard 10" formats—to enhance customer retention. The cartridge uses **KDF® 55** and premium **coconut-shell granular activated carbon (GAC)** to reduce **chlorine**, volatile organic compounds (**VOCs**), trihalomethanes (**THMs**), and most EPA-listed contaminants, improving tap water taste, odor, and clarity. It installs easily on most kitchen faucets and includes a diverter valve for on-demand filtered water.

Features and Benefits

- Replaceable Cartridge System with 4,000 gallon capacity
- KDF®/GAC Filter Media
- Proprietary filter cartridge
- Installs in minutes without tools
- Includes kitchen faucet diverter and adapters that fit most standard faucets
- Long-reach swivel spout
- Bacteriostatic media prevents bacteria growth (algae, fungi)
- Improves taste and color, eliminates odors
- Reduces most EPA listed contaminants
- Includes prorated warranty
- Available with a 5 micron proprietary size carbon block cartridge. 2,500 gallon capacity

Replace after	Capacity* is reached or 12-15 Months (Whichever comes first)
Recommended Flow	0.5 -1.0 gpm
Unit Height / Width	11.5" /5.75" Diameter
